DILONG

YANGZHOU DILONG MACHINERY CO.,LTD

江苏省扬州市江都区武坚工业园区
Wu Jian Industrial Park,Jiangdu District,
Yangzhou City,Jiangsu Province.

公司简介

Company Introduction

扬州地龙机械有限公司，是集各类非开挖设备设计、制造、销售与服务于一体的高新技术企业，专业生产顶管设备、盾构设备及其配套设备。

公司以工法创新和智能化建造为牵引，以设计创新、制造创新、管理创新为支撑，自主研制了顶管机、盾构机、顶盾机、硬岩掘进机（TBM）、异形断面掘进机等多个系列产品。

顶管设备主要为800-5000mm之间的泥水平衡顶管机、土压平衡顶管机、岩石顶管机、矩形顶管机、中继间及各类顶管配套设备。

盾构设备主要为2600-6000mm之间的顶盾机、泥水平衡盾构机、土压平衡盾构机等全套设备。

自创办以来，公司瞄准“卓越品质、一流品牌、穿越全球，打造世界级非开挖生产基地”的模板，广泛吸收国内外先进技术，不断与时俱进、创新提高。其专业设备已达到同业领先水平，并以优异的产品质量、准时的交货期、周到的服务赢得用户的认可和信赖，产品销售到东南亚、中东、非洲多个国家，在业内享有良好的声誉。

竭诚欢迎国内外各界朋友光临洽谈，共谋发展。

Yangzhou Dilong Machinery Co., Ltd. is a collection of various nonA high-tech enterprise integrating the design, manufacturing, sales, and service of excavation equipment, specializing in the production of pipe jacking equipment, shield equipment, and supporting equipment.

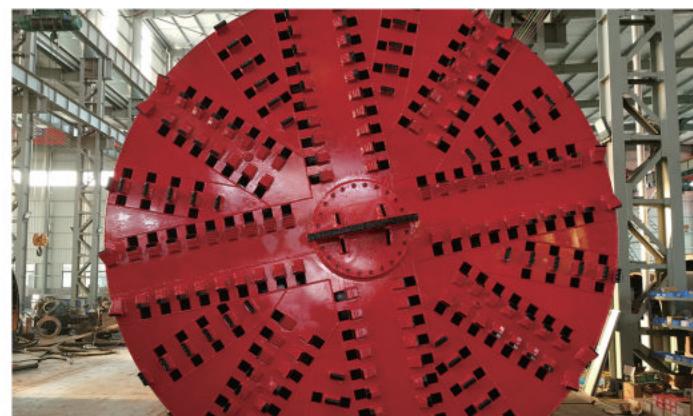

The company has independently developed multiple series of products such as pipe jacking machines, shield machines, top shield machines, hard rock tunneling machines (TBM), and special-shaped section tunneling machines, guided by technological innovation and intelligent construction, and supported by design innovation, manufacturing innovation, and management innovation.

Pipe jacking equipment mainly includes slurry balanced pipe jacking machines between 800-5000mm, earth pressure balanced pipe jacking machines, rock pipe jacking machines, rectangular pipe jacking machines, relay rooms, and various types of pipe jacking supporting equipment.

The shield equipment mainly includes a complete set of equipment ranging from 2600-6000 mm, such as top shield machine, slurry balance shield machine, and earth pressure balance shield machine. Since its establishment, the company has been aiming at the goal of "excellent quality, first-class brand, traversing the world, and creating a base", widely absorbing advanced technologies at home

and abroad, world-class trenchless production and constantly advancing with the times, innovating and improving. Its professional equipment has reached the leading level in the industry, and has won the recognition and trust of users with excellent product quality, punctual delivery time, and thoughtful service. Its products have been sold to many countries in Southeast Asia, the Middle East, and Africa, enjoying a good reputation in the industry.

We sincerely welcome friends from all walks of life at home and abroad to negotiate and seek common development.

泥水平衡顶管机

Mud water balance pipe jacking machine

特征

- 广泛适用于各种土质，如软土、粘土、沙子、砾石土壤、硬土、回填土等。
- 独立的注水、排水系统。
- 最快速度达每分钟近 200 毫米。
- 精度高，上下左右转动操作，最大转向角度为 5.5 度。
- 使用地面中央控制系统，安全，直观，方便。

Feature

- Wide applicable various soil, such as soft soil, clay, sand, gravel soil, hard soil, backfill . etc ..
- Independent water injection, discharge system.
- The fastest speed is nearly 200 mm per minute.
- The construction of high precision,
- right, and the most steeringangle of 5.5 degrees.
- Use the central control system on the ground, safe, intuitive, and convenient.

土压平衡顶管机

Earth pressure balance pipe jacking machine

特征

- 大刀盘土压平衡隧道顶管机适用于软土、硬土、沙子、卵石层，适合各种土壤条件。
- 通过合理的灌浆方式可以改善土壤，保持控制面和地面沉降的稳定。
- 土壤运输、处理方便，工作环境良好、安全，操作方便，适用于大、中口径顶管作业。

Feature

- Earth pressure balance micro-tunnel boring machine of large cutter disk is used in soft soil, hard soil, sand and pebble layer , and is suitable all kinds of soil conditions.
- By reasonable way of grouting can improve soil,maintain stability of the control surface and ground subsidence.
- Soil transport and handling convenient, simple, good working environment, safety, convenient operation, suitable for medium and large diameter pipejacking operations.

岩石顶管机

Rock pipe jacking machine

特征

- 1、刀头磨损时，可以从机器内部更换，适用于长距离的顶管施工。
- 2、适用于普通土层、巨石、基岩和混合土壤。岩石硬度：50-200 帕。
- 3、内部圆锥粉碎机可以有效地进行二次粉碎。
- 4、地面电脑控制。

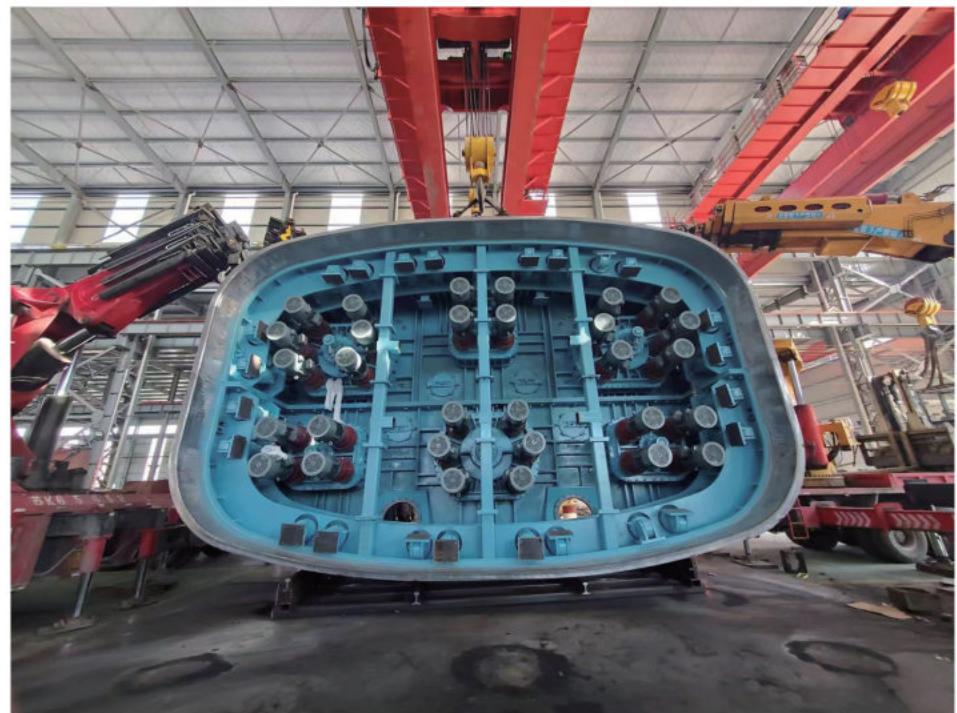

Feature

- 1、Cutter bit, when worn out, can be replace from inside of the machine, so suitable for longdistance pipe jacking construction of rock.
- 2、Suitable for ordinary soil layer to the giantboulders, bedrock and mixed soil. Rockhardness, 50-200 Mpa.
- 3、Internal cone crushingplant can be insecondary crushing effectively.
- 4、The ground computer control.

土压平衡矩形顶管机

Earth pressure balanced rectangular pipe jacking machine

技术特点：

- 采用多刀盘切削，切削率大于90%，针对盲区设置了铲齿刀与导流板，刀具布置满足穿越加固区的施工要求。
- 顶管机主轴密封和壳体铰接密封具有高可靠性，保护主轴及防止铰接部位透水。
- 具有铰接纠偏功能，配合四周注泥孔有效调整姿态。
- 在前壳体上方布设防背土注浆槽，防止背土现象发生。
- 具有土体改良功能，满足复杂不良地层中顶进和出土的施工要求。

应用领域：

主要用于城市市区，在不封闭交通，不搬迁地下管线，不破坏街景的情况下，建设地下通道，地铁车站出入口，地下公共设施管线等地下工程。

Technical characteristics:

- Multiple cutting discs are used for cutting, with a cutting rate greater than 90%. For blind spots, tooth cutters and guide plates are installed, and the tool arrangement meets the construction requirements for crossing the reinforcement area.
- The main shaft seal and shell hinge seal of the pipe jacking machine have high reliability, protecting the main shaft and preventing water leakage at the hinge parts.
- Equipped with articulated correction function, it can effectively adjust the posture in conjunction with surrounding mud injection holes.

Application field:

- Install anti backsoil grouting slots above the front shell to prevent backsoil phenomena from occurring.
- It has the function of soil improvement, meeting the construction requirements of jacking and excavation in complex and unfavorable formations.

Feature

- 适合各种土壤条件：可以通过更换切割盘来应用于所有土壤。
- 高功率：二次粉碎能力强。
- 刀轮驱动系统采用意大利行星齿轮减速机，动力强，质量可靠。
- 采用电机变频技术，刀盘速度可调。
- Applicable to various soil conditions; Can be applied to all kinds of soil by replacing the cutting disk.
- High power; Has strong ability of secondary crushing.
- Drive system in cutter wheel adopts Italian planetary, power flow strong and more reliable in quality.
- Using the motor frequency conversion technology, the speed of the cutter disk is adjustable.

NPD600泥水平衡顶管机

NPD 600 mm Slurry Balance Micro-tunnel Boring Machine

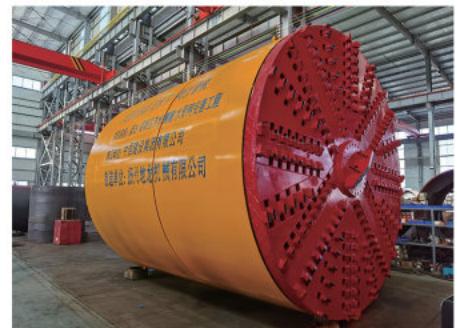

技术特点

- 顶管机采用15KW电机驱动或液压马达驱动，扭矩23KN.m，转速5r/min。
- 顶管机结构紧凑，采用反顶设备，液压马达式可以做到在Φ2600mm圆井内施工，节省工作空间。顶管机适用于硬土、软土、沙土层顶进。

Technical Characteristics

- The pipe jacking machine is driven by a 15KW motor or hydraulic motor, with a torque of 23KN. m and a speed of 5r/min.
- The pipe jacking machine has a compact structure and adopts reverse jacking equipment. The hydraulic motor type can achieve Φ Construction inside a 2600mm circular well, saving work space. The pipe jacking machine is suitable for jacking in hard soil, soft soil, and sandy soil layers.

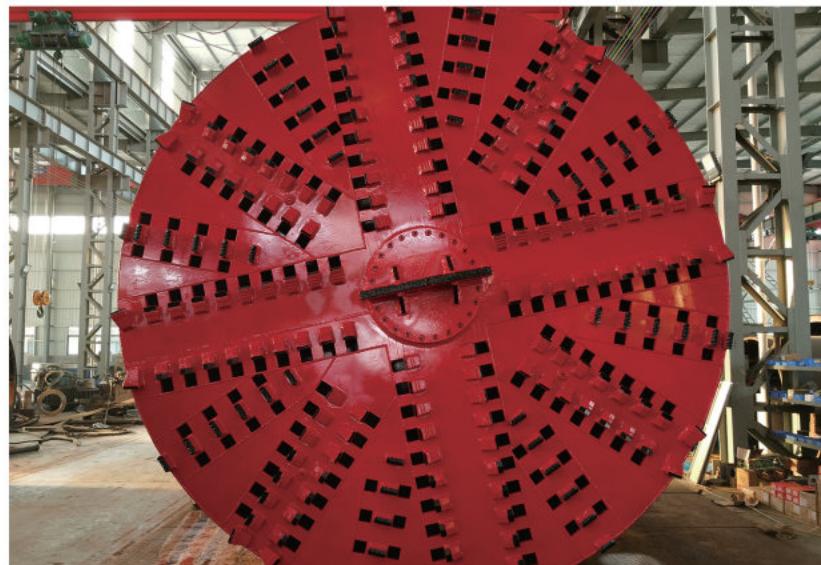

NPD3500 泥水平衡顶管机

NPD3500mm Slurry Balance Micro-tunnel Boring Machine

技术特点

- 1.本台顶管机动力采用8台37KW减速机组动力 刀盘扭矩1850KN.m，刀盘转速0-1.55r/min。
- 2.以泥水压力来平衡土压力和地下水压力，又以泥水作为输送弃土介质。对所施

Technical Characteristics

- 1.This pipe jacking machine is powered by eight 37KW speed reduction units, with a cutter head torque of 1850KN. m and a rotation speed of 0-1.55r/min.
- 2.The mud water pressure is used to balance the earth pressure and groundwater pressure, and the mud water is used to transport the waste soil. The soil around the pipe jacking is less disturbed, the ground settlement is easy to control, the continuous excavation operation can be realized, the jacking speed is fast, the operation is simple, the service life is long, and it is suitable for long-distance pipe jacking construction.

PSD3000 砂卵石顶管机

PSD3000 Sand Pebble Pipe Jacking Machine

技术参数

- 1.顶管机动力采用 6 台 37KW 变频电机驱动，额定扭矩可达 1580KN.M，转速 0-2.5r/min 可调。
2. 多刀盘、开挖面全覆盖设计，所有刀盘

同平面布置，刀盘切削区域不相互交叉，同时配备高效的渣土改良系统，达到高效、快速、安全的施工要求，应用于卵石含量高、粒径大、硬度强的砂卵石地层。

Technical Parameters

- 1.The power of machine is driven by six 37KW inverter motors, with a rated torque of 1580KN.M and an adjustable speed of 0-2.5r / min.
- 2.Multi cutterhead and excavation face are designed with full coverage. All Cutterheads are arranged in the same plane. The cutterhead cutting area is not intersected with each other. At the same time, an efficient residue soil improvement system is equipped to meet the requirements of efficient, fast and safe construction. It is applied to the sandy pebble stratum with high pebble content, large particle size and strong hardness.

FD2000 复合式顶管机

FD2000mm Compound Pipe Jacking Machine

技术参数

Technical Characteristics

1. 顶管机动力采用 4 台 45KW 变频电机驱动, 额定扭矩可达 920KN.M, 转速 0-3r/min 可调, 刀盘采用整板开洞, 相比较条幅式刀盘, 阻力大大减小。
2. 结合岩石顶管机与泥水平衡顶管机特点, 可在特殊复杂土质中使用。

1. The pipe jacking power is driven by four 45KW variable frequency motors, with a rated torque of 920KN.M, a rotation speed of 0-3R / min adjustable, and the cutter head adopts a whole plate to cut holes. Compared with the strip cutter head, the resistance is greatly reduced.
2. Combined with the characteristics of rock pipe jacking machine and mud water balance pipe jacking machine, it can be used in special complex soil.

YD1000 岩石顶管机

YD1000 Rock Pipe Jacking Machine

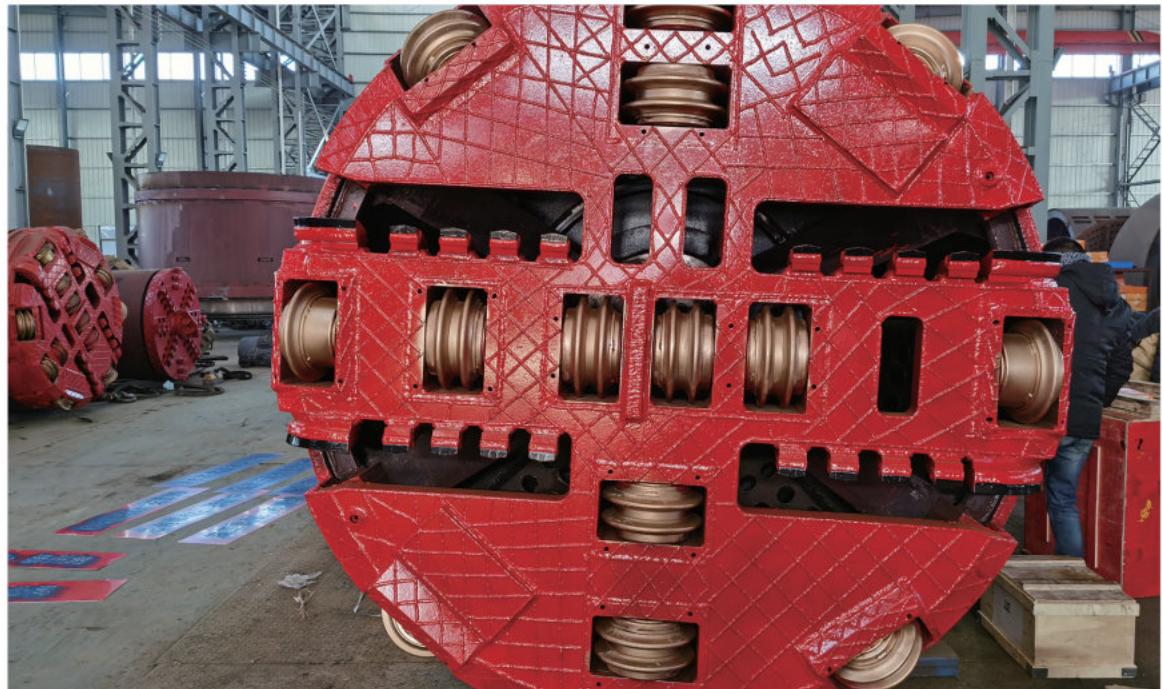

特征

1. 顶管机采用3台11KW变频电机驱动, 额定扭矩100KN.m, 转速0-3.2r/min可调。
2. 顶管机采用回转支承驱动结构, 配备前供水, 无中心轴, 维修人员可自由进入破碎仓检查、更换刀具, 实现长距离顶进。顶管机适合在沙土、卵石、岩层顶进。

Feature

1. The pipe jacking machine is driven by three 11KW variable frequency motors, with a rated torque of 100KN.m and an adjustable speed of 0-3.2r/min.
2. The pipe jacking machine adopts a rotary bearing drive structure, equipped with front water supply, without a central shaft, and maintenance personnel can freely enter the crushing bin to inspect and replace tools, achieving long-distance jacking. The pipe jacking machine is suitable for jacking in sandy soil, pebbles, and rock layers.

YD2000岩石顶管机
YD2000 Rock Pipe Jacking Machine

特征

1、顶管机采用4台37KW变频电机驱动，额定扭矩600KN.m，转速0-3r/min可调。
2、顶管机采用中心主轴式驱动结构，配备前供水与外供水，顶部设有进人孔，维修人员可自由进入破碎仓检查、更换刀具，实现长距离顶进。顶管机适合在沙土、卵石、全断面岩层顶进。

Feature

1、The pipe jacking machine is driven by four 37KW variable frequency motors, with a rated torque of 600KN.m and an adjustable speed of 0-3r/min.
2、The pipe jacking machine adopts a central spindle drive structure, equipped with front water supply and external water supply, and

has a manhole at the top. Maintenance personnel can freely enter the crushing bin to inspect and replace tools, achieving long-distance jacking. The pipe jacking machine is suitable for jacking in sandy soil, pebbles, and full section rock layers.

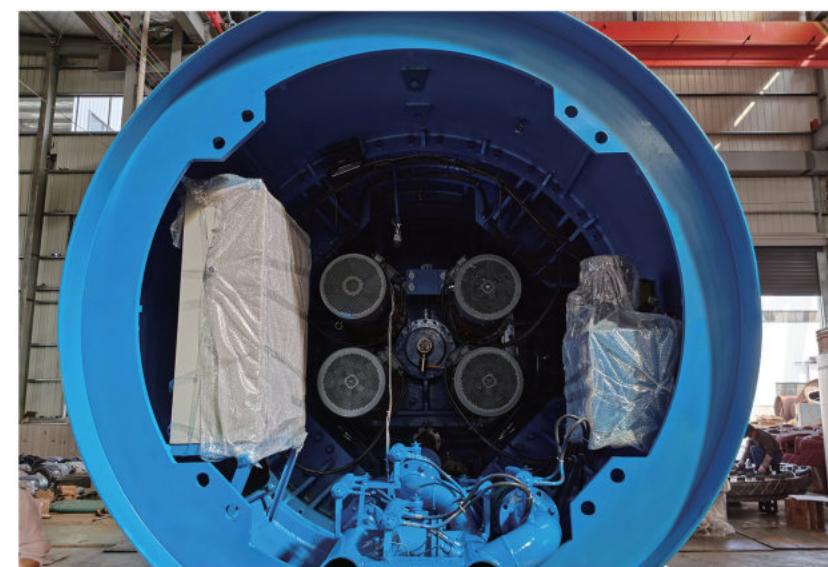

YD2400岩石顶管机
YD2400 Rock Pipe Jacking Machine

技术特点

1、顶管机采用4台45KW变频电机驱动，额定扭矩645KN.m，转速0-2.7r/min可调。
2、顶管机采用中心主轴式驱动结构，配备前供水与外供水，顶部设有进人孔，维修人

员可自由进入破碎仓检查、更换刀具，实现长距离顶进。顶管机适合在沙土、卵石、全断面岩层顶进。

Technical Characteristics

1.The pipe jacking machine is driven by four 45KW variable frequency motors, with a rated torque of 645KN.m and an adjustable speed of 0-2.7r/min.
2.The pipe jacking machine adopts a central spindle drive structure, equipped with front water supply and external water supply, and has a manhole at the top. Maintenance personnel can freely enter the crushing bin to inspect and replace tools, achieving long-distance jacking. The pipe jacking machine is suitable for jacking in sandy soil, pebbles, and full section rock layers.

YD3000 岩石顶管机

YD3000mm Rock Micro-tunnel Boring Machine

技术参数

1. 顶管机动力采用 6 台 37KW 变频电机驱动, 额定扭矩可达 1580KN.M, 转速 0-2.5r/min 可调。
2. 采用内齿圈传动机构, 传动力矩大, 无中心轴, 维修人员可自由进入泥水仓, 可以进行二次破碎, 能更换刀具, 传动力矩大, 能在硬土层、沙土层、砾石层、岩石层中间进行掘进。

Technical Parameters

1. Power system of six 37kw inverter motors, with a rated torque of up to 1580KN.M, and the speed can be adjusted from 0-2.5r / min.
2. The internal ring gear transmission mechanism is adopted, which has large transmission torque and no central axis. The maintenance personnel can enter the muddy water bin freely, can carry out secondary crushing, can replace the cutting tools, has large transmission torque, and can drive in the middle of hard soil layer, sand layer, gravel layer and rock layer.

YD 3000 岩石顶管机

YD3000mm Rock Micro-tunnel Boring Machine

技术参数

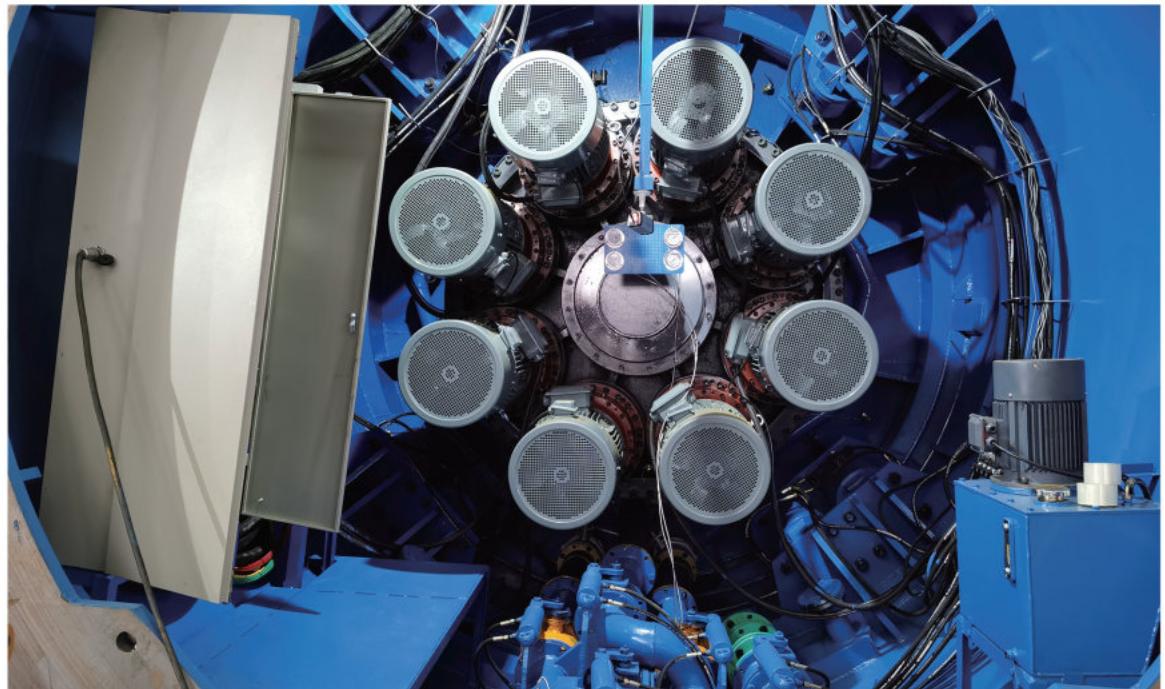

1. 顶管机动力采用 7 台 45KW 变频电机驱动, 额定扭矩可达 2400KN.M, 转速 0-2.5r/min 可调, 刀盘采用整板开洞, 相比较条幅式刀盘, 阻力大大减小。

Technical Parameters

- The power of machine is driven by 7 45KW inverter motors, with a rated torque of up to 2400KN.M, and the speed can be adjusted from 0-2.5r / min.

YD3200岩石顶管机

YD3200 Rock Pipe Jacking Machine

特征

1、顶管机采用8台45KW变频电机驱动，额定扭矩1790KN.m，转速0-1.9r/min可调。
2、顶管机采用中心主轴式驱动结构，配备前供水与外供水，顶部设有进人孔，维修人员可自由进入破碎仓检查、更换刀具，实现长距离顶进。顶管机适合在沙土、卵石、全断面岩层顶进。

Feature

1、The pipe jacking machine is driven by 8 45KW variable frequency motors, with a rated torque of 1790KN.m, and an adjustable speed of 0-1.9r/min.
2、The pipe jacking machine adopts a central spindle drive structure, equipped with front water supply and external water supply, and

has a manhole at the top. Maintenance personnel can freely enter the crushing bin to inspect and replace tools, achieving long-distance jacking. The pipe jacking machine is suitable for jacking in sandy soil, pebbles, and full section rock layers.

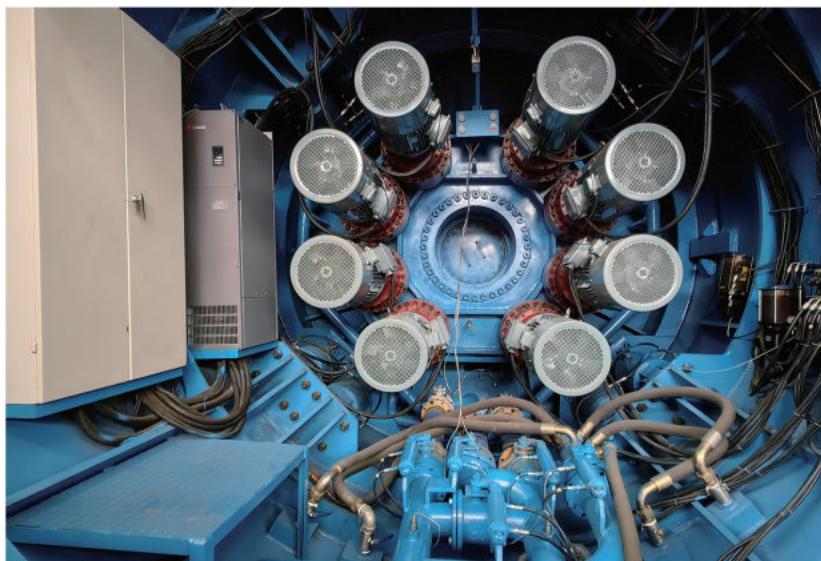

YD3500回转支承岩石顶管机

YD3500 Rotary Bearing Rock Pipe Jacking Machine

技术特点

1、顶管机采用8台45KW变频电机驱动，额定扭矩1990KN.m，转速0-1.72r/min可调。
2、顶管机采用回转支承驱动结构，配备前供水、外供水，中心注水，相对于主轴式顶管机减少了小齿轮受力更加安全，也缩短了机身长度。

3、无中心轴，维修人员可从回转支承中部或设备顶部自由进入破碎仓检查、更换刀具，实现长距离顶进。顶管机适合在沙土、卵石、全断面岩层顶进。

Technical Characteristics

1、The pipe jacking machine is driven by 8 45KW variable frequency motors, with a rated torque of 1990KN.m and an adjustable speed of 0-1.72r/min.
2、The pipe jacking machine adopts a rotary bearing drive structure, equipped with front water supply, external water supply, and center water injection. Compared to the spindle type pipe jacking machine, it reduces the force on the small gear and is safer, and also shortens the length of the body.
3、Without a central axis, maintenance personnel can freely enter the crushing chamber from the middle of the slewing support or the top of the equipment to inspect and replace tools, achieving long-distance jacking. The pipe jacking machine is suitable for jacking in sandy soil, pebbles, and full section rock layers.

重型反顶架

Heavy reverse top frame

1. 反顶架总推力900T，每台油缸推力225T，工作行程3000mm-3500mm。
2. 反顶架适用于外径2500mm以下的设备顶进。

- 1.The total thrust of the reverse jacking frame is 900T, and the thrust of each oil cylinder is 225T, with a working stroke of 3000mm-3500mm;
- 2.The reverse jacking frame is suitable for jacking equipment with an outer diameter of less than 2500mm.

The Company Mainly Sales Performance

面对市场的机遇和挑战，品质卓越 -- 我们的追求，诚信服务 -- 我们的宗旨。
本公司愿以合理的价格、精良的设计、
稳定的质量、快捷的交货期、周到的服务、
为广大客户提供优质、高效、精良的装备。
